## Appendix: Definitions

**Total SIM cards:** Total SIM cards registered with an operator's Home Location Register (HLR) or in the Home Subscriber Server (HSS) at the date in question. So, for business clients, each line is considered as a post-paid contract. Post-paid cards are those whose service is invoiced regularly (packages, metered offers, blocked accounts, etc.). By default, any non-post-paying client is considered to be a pre-paying client.

**Internet SIM cards:** number of SIM cards sold by mobile operators (flat rates or prepaid cards), to be used solely for accessing the Internet (PCMCIA cards, 3G/4G USB keys). These cards cannot be used to make voice calls.

**Gross sales:** total SIM cards at the end of the quarter which are registered with the HLR/HSS during the quarter. They exclude migrations: pre-paid to post-paid migration corresponds to clients asking their operator to replace their pre-paid offer in force at the beginning of the quarter with a post-paid offer; conversely, post-paid to pre-paid migration corresponds to clients asking their operator to replace their post-paid offer in force at the beginning of the quarter with a pre-paid offer.

**Cancellation:** Total SIM cards at the beginning of the quarter whose registration in the HLR/HSS was deleted during the quarter. Modifications to the registration in the HLR/HSS are not cancellations. So, this definition does not cover changes in offers within a line, or pre- to post-paid migrations or post- to pre-paid migrations, or service suspensions.

**Penetration rate:** Penetration rate: it is obtained by dividing the total number of clients by the population. The reference population is 1st January of the year N-1 published by Insee on the 1<sup>st</sup> January of the year N. The reference population in 2021, comes from estimates published in January 2021 (and therefore of the population for January 1<sup>st</sup>, 2020).

**Customers not under commitment contract:** a client under a commitment contract is any client having taken out or renewed a contract (out of all or part of the contracts related to mobile service) for a minimum period not having expired at the date in question. A client not under commitment contract is any client not having a contract.

**Total active customers:** the number of active clients equals to all post-paid customers under contract and pre-paid customers under contract having made or received a telephone call, whether free or paid, sent a SMS, MMS used a multimedia (e-mail, internet) service during the past three months (not including incoming SMS).

**Number of ported numbers:** is calculated as half of the volume of numbers of "in" porting and "out" porting done by all operators. "In" porting is considered to be an effective porting from the receiving operator's point of view. "Out" porting is an effective porting from the donor operator's point of view.

**Total MtoM cards:** number of SIM cards used for communication between remote equipment (remote management of equipment, terminals and servers, fixed or mobile). The communications from these cards are generally carried out without human intervention. These cards are used for example for tracking of objects and tools (fleets of vehicles, machinery, etc.), for purposes of updating of data (surveys at distance of meters, sensors...), for the identification and monitoring of all kinds (alarms, remote actions...), the list of those uses where communication is from "machine to machine" is not limited. Are taken into account the MtoM SIM cards, the communication was done only in downstream, only upstream or both. The cards used for interpersonal communication and exclusive internet cards are not included here.
